📍 Gijón, Asturias  
🌐 [Ricardo Albarenque](#)

Creative, self motivated and problem solving with a passion for pixel-perfect, accessible and visually appealing designs. I love writing clean, understandable and reusable code. I'm well organized, very good team worker and also have excellent communication skills.

### Experience

#### Ricardo Albarenque - Personal Website

React.js / React Context / HTML / CSS

Personal website featuring my projects, skills, biography and more. Fully responsive layout with codecrafted CSS. Additionally, I use React Context for language selection. Dynamically retrieving data for:

- Projects
- Skills

#### Black Dog Shop - eCommerce for Skateboards and Clothing

Django / PostgreSQL / AWS / Stripe / jQuery / HTML / Bootstrap / CSS

Place orders as anonymous or registered user, allowing users to checkout in a fast and secure way with Stripe payments API:

- Admin: Can view and manage products, categories and orders.
- Users: Can place orders and save delivery information in their profile for future orders. Can also review order history from profile.

#### BonTeeth - Appointment Booking System

Flask / MongoDB / jQuery / HTML / Materialize / CSS

Book and manage appointments, send or receive internal messages for registered users. There's two possible scenarios for the usage of this App:

- Admin: Can view and manage appointment requests.
- Users: Can book appointments and cancel or edit them.

#### Guess the Word - Game

JavaScript / jQuery / RestAPI / HTML / CSS

Given the hint of a word and you have to guess the missing characters. The game is powered by two APIs and relies on them to work:

- Random words API: Used for getting random words.
- Free dictionary API: Used for retrieving word definitions and phonetics.
