🌐 [Ricardo Albarenque](#)

Creative, self motivated and problem solving with a passion for pixel-perfect, accessible and visually appealing designs. I love writing clean, understandable and reusable code. I'm well organized, very good team worker and also have excellent communication skills.

Experience

Black Dog Shop - eCommerce for Skateboards and Clothing

Django / PostgreSQL / AWS / Stripe / jQuery / HTML / Bootstrap5 / CSS

Place orders as anonymous or registered user, allowing users to checkout in a fast and secure way with Stripe payments API:

- Admin: Can view and manage products, categories and orders.
- Users: Can place orders and save delivery information in their profile for future orders. Can also review order history from profile.

BonTeeth - Appointment Booking System

Flask / MongoDB / jQuery / HTML / Materialize / CSS

Book and manage appointments, send or receive internal messages for registered users. There's two possible scenarios for the usage of this App:

- Admin: Can view and manage appointment requests.
- Users: Can book appointments and cancel or edit them.

Guess the Word - Game

JavaScript / jQuery / RestAPI / HTML / CSS

Given the hint of a word and you have to guess the missing characters. The game is powered by two APIs and relies on them to work:

- Random words API: Used for getting random words.
- Free dictionary API: Used for retrieving word definitions and phonetics.

Beauty Bay - Static Mockup Website

HTML / CSS / Bootstrap / jQuery

eCommerce mockup website for makeup, cosmetic and beauty products.
